PERSONAL WEBSITE <https://lee-daeHo.github.io/>

INTRODUCTION My research focuses on AI for Human, HCI, (multi-modal) AI for Extended Reality. I'm very interested in enhancing user experience when human interacts with computer system, believing that AI should be useful and reliable tool for human. I have done projects and studies across disciplines, including Mechanical Engineering, Art, Computer Science, Education, etc.

My ultimate goal is to develop seamless extended reality experiences that make human interaction more intuitive, comfortable, and joyful.

EDUCATION

Mar 2020 — Present	M.S/Ph.D Integrated Course, Gwangju Institute of Science and Technology (GIST) Department of AI Convergence Advisor : Jin-Hyuk Hong	Gwangju, KR
Mar 2014 — Feb 2020	Bachelor's Degree, SeoulTech Mechanical System Design Engineering	Seoul, KR

EXPERIENCE

Dec 2025 — May 2026	Visiting Researcher, University of Colorado, Boulder ATLAS Institute Advisor : Ryo Suzuki	Boulder, CO, USA
---------------------	---	------------------

RESEARCH INTERESTS

- AI for Human
- AI for Extended Reality
- Multimodal AI
- User Experience

PEER-REVIEWED CONFERENCES AND JOURNALS

C4.	HumanoidTurk: Expanding VR Haptics with Humanoids for Driving Simulations DaeHo Lee , Ryo Suzuki*, Jin-Hyuk Hong* (*Co-corresponding authors)	CHI 2026
C3.	Seeing and Sensing Intention: Resolving Midas Touch with Vision-Motion Fusion in Mixed Reality	UIST 2025 (Poster)

	DaeHo Lee , ChungHa Lee, Jin-Hyuk Hong	
C2.	MVPrompt: Building Music-Visual Prompts for AI Artists to Craft Music Video Mise-en-scène ChungHa Lee, DaeHo Lee , Jin-Hyuk Hong	CHI 2025
C1.	Styling Words: A Simple and Natural Way to Increase Variability in Training Data Collection for Gesture Recognition WooJin Kang*, In-Taek Jung*, DaeHo Lee* , Jin-Hyuk Hong (*Co-first authors)	CHI 2021

EXHIBITION

Mar 2021 —Apr 2021	Please note that if you don't wear a face mask, you restrict to () Youjin Choi, Sooyeon Ahn, DaeHo Lee , JuChan Seo Won the New Media Art Contest from Seoul Art Center and Korea Electric Power Corporation. Exhibited in Seoul Art Center
--------------------	---

SKILLS	Expert	Python Pytorch C# User Study Micro Controller SPSS R	Experienced	Circuit Design C Unity
			Skillful	HTML & CSS Javascript

SERVICES

	External Reviewer for ISMAR '26, UIST '26, DIS '26, CHI '26 (paper & poster), CHI '25, IEEE VR '25, ISMAR '25, SUI '25, CSCW '25 (poster)
Sep 2022 — Dec 2022	Teaching Assistant: AI Core Technology based Project

MEDIA

May 2026	“HumanoidTurk' is a system where a humanoid robot rocks the seat from behind in sync with a VR driving simulator.”, Gigazine (Japan)	[English]
